

HEBEI YUEHONG INTELLIGENT WELDING EQUIPMENT CO.,LTD.

Polyolefin Pipeline Joints Coating Equipment YH-3BSPO

Operation simply

Automatic coating

Environment protection

Features of Polyolefin Pipeline Joints Coating Equipment:

1. Polyolefin composite coating for on-site patching of 3LPP/3LPE submarine pipe joints.
2. LCD screen control, moisture-proof and moisture-proof.
3. Simple structure, reliable performance, no pollution and high degree of automation.
4. The operation is simple, and the influence of man-made unfavorable factors is eliminated.
5. It can be set up to adapt to a variety of subsea pipeline node structures to ensure reliable installation of anti-corrosion materials.

Executive Agency:

No	Name	Function Description	
1	Silo	Made of non-metal internal, smooth, store polyolefin composite tape and other composite coil materials, no damage.	
2		Automatic transmission and correction of the composite belt to ensure the smooth bonding of the composite belt to the steel pipe, and the front edge of the composite belt is parallel to the axis of the steel pipe.	
3	Internal Rotation	Automatic rotation	Winding and rotating with the composite tape, automatically rotating along the ring direction of the steel pipe.
4		Stable transmission	Stable rotation start-stop and steering without vibration
5		Flat pressing	With heating device
6			Extruded composite tape
9	External Rack	Reliable lifting	Automatic opening and closing
10		Locking system	Automatic locking, stable and firm
